

### Week-1

#### Objectives of HTML:

- Understand the basic structure and purpose of HTML in web development.
- Learn to use HTML tags, elements, and attributes effectively.
- Create web pages with text, forms, input fields, and interactive elements.
- Develop simple static web pages using proper HTML document structure.
- Learn how to create and save a basic HTML page using a text editor and a web browser.

#### Objectives of CSS:

- Understand the purpose of CSS in web design
- Apply styles using different CSS methods
- Control layout, colors, fonts, and spacing
- Use selectors, classes, and IDs
- Design visually appealing and responsive web pages

**Aim:** Build a responsive web application for shopping cart with registration, login, catalog and cart pages using CSS3 features, flex and grid.
